PROFESSIONAL SUMMARY

Senior Flutter Developer with 5.9+ years of experience building and releasing production-grade cross-platform iOS, Web and Android applications using Flutter and Dart. Strong in state management (Bloc/Cubit, Provider, GetX, Riverpod), Clean Architecture, REST API and Firebase integration, native platform channels, and CI/CD with Google Play and App Store release management. Delivered apps across e-commerce, HR, identity, healthcare, and enterprise domains. Author of two open-source packages on pub.dev and 20+ technical articles on Medium. Experienced in mentoring junior developers and owning features end to end.

TECHNICAL SKILLS

Languages & Frameworks: Dart, Flutter, JavaScript, Node.js

State Management: Bloc/Cubit, Provider, GetX, Riverpod

Architecture & Patterns: Clean Architecture, Repository Pattern, Dependency Injection, Feature-First Modular Structure, Native Platform Channels

Backend & APIs: RESTful APIs, Firebase (Authentication, Firestore, Cloud Functions, FCM), Node.js/Express, MongoDB, WebSockets

Testing & Quality: Unit Testing, Widget Testing, Integration Testing, bloc_test, Mocktail, Code Review

Performance: Flutter DevTools Profiling, Rebuild Optimization, Lazy Loading, Pagination, App Size and Startup Optimization

Integrations: Razorpay, Stripe, Google Maps, Push Notifications, Localization (i18n), Local Storage

DevOps & Release: Git, CI/CD Pipelines, Google Play Store and Apple App Store Release Management, Staged Rollouts

Tools & Methodology: Android Studio, VS Code, Xcode, Jira, Agile

AI Tools: GPT, Gemini, Claude, Agentic AI Workflows, Prompt Engineering

Platforms: Android, iOS, Web

PROFESSIONAL EXPERIENCE

Senior Software Engineer (Flutter) | Kellton Tech Solutions Limited | Oct 2023 – Present

- Own end-to-end Flutter feature delivery on client mobile applications, from technical design and implementation through testing and production release, with minimal supervision.
- Architected a scalable, reusable theming and color system with full light and dark mode support, replacing ad-hoc styling and establishing one consistent design language across all screens and modules.
- Collaborate with backend engineers on Node.js/Express and MongoDB REST API design, including role-based access control, keeping the mobile app and backend contract in sync.
- Mentor junior Flutter developers through code reviews and pair programming, raising code quality and performance standards across the team.
- Evaluated and deployed backend stacks on Render (free-tier and production), reducing infrastructure cost while keeping deployments production-ready.

Flutter Developer | Cyfuture India Pvt. Ltd. | Aug 2022 – Oct 2023

- Built and maintained cross-platform Flutter applications with responsive UI and smooth runtime performance across device sizes.
- Integrated RESTful APIs and third-party SDKs to deliver key product features on schedule against client-defined timelines.
- Implemented state management with Provider and GetX, streamlining app architecture and reducing boilerplate code.
- Participated in code reviews and structured testing cycles that kept release quality consistently high.

Software Developer (Flutter) | Virtual Employee Pvt. Ltd. | Apr 2021 – Aug 2022

- Developed and shipped Flutter applications for multiple clients, owning the full lifecycle from development through Google Play and App Store publishing.
- Worked directly with international clients to gather requirements and turn feedback into iterative feature releases.
- Implemented Firebase Authentication, storage, and push notification (FCM) workflows that became the standard integration pattern across client projects.

Mobile App Developer Trainee | Progmattic AI Pvt. Ltd. | Feb 2020 – Sep 2020

- Trained in Flutter and Dart fundamentals and contributed to early-stage mobile application development.

KEY PROJECTS

- **Roll Mobility** – Accessibility navigation app that helps wheelchair users, caregivers, and allies evaluate the accessibility of public spaces such as cafes, hotels, campuses, and event venues. [Google Play](#)
- **HMEL LEC** – Land evaluation app capturing land dimensions, water availability, vegetation, and roadside infrastructure, with photo capture and GPS geo-tagging. [Google Play](#)
- **SharePa by Idemia** – Step-by-step user guide app supporting product configuration workflows. [Google Play App Store](#)
- **Pristine Connect** – Cross-platform healthcare collaboration app for surgeons, patients, and facility staff, streamlining clinical operations. [App Store](#)
- **LIC HRMS** – HR management system with employee self-service workflows for LIC. [Link](#)
- **Axon Fire** – Flutter mobile game built independently end to end; resolved audio latency and frame drops by integrating native Android SoundPool via platform channels. [Google Play](#)
- **mBox** – Financial debit/credit tracker app, Add transaction, Update and fetch transactions. [Google Play](#)

OPEN SOURCE & PUBLICATIONS

- **pub.dev packages:** watermark_image (pub.dev/packages/watermark_image), easy_dropdown (pub.dev/packages/easy_dropdown)
- **Technical writing:** 20+ Flutter and Dart articles on Medium (medium.com/@mailtomprakash1)

EDUCATION

Master of Computer Applications (MCA) | Institute of Information Technology & Management, Janakpuri, New Delhi | Aug 2017 – Jun 2020
