

MANISH PRAKASH

Senior Flutter Developer

Senior Flutter Developer with 5.9+ years of experience building and shipping production mobile applications across e-commerce, HR, identity, and enterprise domains. Strong background in cross-platform architecture, state management, RESTful and Firebase-backed integrations, and end-to-end app delivery from design through Play Store and App Store release. Published an open-source Dart package on pub.dev and authored 20+ technical articles on Medium. Comfortable owning features independently, mentoring junior developers, and translating ambiguous business requirements into clean, maintainable technical solutions.

Phone: +91 8210710217 **Email:** mailtomprakash1@gmail.com

Medium: <https://medium.com/@mailtomprakash1>

GitHub: <https://github.com/mparakashgithub>

Dart Package (pub.dev): https://pub.dev/packages/watermark_image, https://pub.dev/packages/easy_dropdown

SKILLS

Flutter / Dart: Widget lifecycle & rendering, custom widgets, CustomPainter, animations (implicit, explicit, Hero), null safety, async/await, Streams, Isolates, Custom Package Development, Payment Gateway

State Management: Provider, GetX, Bloc/Cubit, Riverpod-aware — selecting the right approach based on app complexity

Architecture: Clean Architecture, Repository pattern, dependency injection (get_it/injectable/bindings), modular/feature first project structure

Testing & Quality: Unit testing, widget testing, integration testing, code review practices

Backend & APIs: RESTful APIs, Firebase (Auth, Firestore, Cloud Functions, FCM), Node.js/Express, MongoDB, WebSockets

Integrations: Google Maps, Localization (i18n), Local Storage, Push Notifications, Razorpay, Stripe

Performance: DevTools profiling, rebuild optimization, lazy loading & pagination, app size and startup optimization

DevOps & Release: Git, CI/CD pipelines, Fastlane, Play Store & App Store release management, staged rollouts

Platforms: iOS, Android, Web, Cross-Platform Development

AI Tools: GPT, Gemini, Claude, Agentic AI workflows for productivity, Prompting

Project Management Tool: Jira, Agile methodology

Languages: English, Hindi

Soft Skills: Team leadership, mentoring, effective communication, stakeholder collaboration

EDUCATION

Master of Computer Applications (MCA)

Institute of Information Technology & Management, Janakpuri, New Delhi Aug 2017 – Jun 2020

EXPERIENCE

Senior Software Engineer

Kellton Tech Solutions Limited [Oct 2023 – Present]

- Lead Flutter development on client mobile applications, owning features end-to-end from technical design through release.
- Architect scalable app theming and color systems with light/dark mode support, driving consistency across multiple screens and modules.
- Collaborate with backend teams on Node.js/Express and MongoDB APIs, including permission and role-based access design.
- Mentor junior developers on Flutter best practices, code quality, and performance optimization.

- Evaluate and integrate free-tier and production backend stacks (Render, Supabase, Upstash) for cost-efficient deployments.

Flutter Developer

Cyfuture India Pvt. Ltd. [Aug 2022 – Oct 2023]

- Developed and maintained cross-platform Flutter applications with a focus on responsive UI and smooth performance.
- Integrated RESTful APIs and third-party SDKs to deliver key product features on schedule.
- Implemented state management solutions (Provider, GetX) to streamline app architecture and reduce boilerplate.
- Participated in code reviews and testing cycles to maintain high release quality.

Software Developer – Flutter Developer

Virtual Employee Pvt. Ltd. [Apr 2021 – Aug 2022]

- Built and shipped Flutter applications for multiple client projects, managing the full lifecycle from development to Play Store/App Store publishing.
- Worked directly with international clients to gather requirements and deliver iterative feature updates.
- Implemented Firebase-based authentication, storage, and push notification workflows.

Mobile App Developer Trainee

Progmattic AI Pvt. Ltd. [Feb 2020 – Sep 2020]

- Trained in Flutter and Dart fundamentals, contributing to early-stage mobile application development.

PROJECTS

Roll Mobility

Roll Mobility makes it easier for wheelchair users, caregivers, and allies to navigate public spaces with confidence. Whether you're going to a coffee shop, hotel, campus, or event venue, Roll helps you discover how accessible it really is before you get there.

Android: <https://play.google.com/store/apps/details?id=com.rollappinc.mobilityapp>

HMEL LEC

This application helps to evaluate land details on various parameters like dimensions of the land, water available, trees on land, roadside divider etc. Apart from capturing these parameters, Photos and GEO tagging of the locations is also captured.

Link: <https://play.google.com/store/apps/details?id=hmel.app.lec>

SharePa by Idemia

The prime purpose of the application is to provide a step by step user Guide for product configuration.

Android: <https://play.google.com/store/apps/details?id=com.idemia.idemia>

iOS: <https://apps.apple.com/in/app/sharepa-by-idemia/id1499787871>

Pristine Connect

Cross-platform app tailored to the needs of surgeons, patients, and facility staff, our solution revolutionises the entire process, ensuring seamless collaboration, enhanced patient outcomes, and streamlined operations.

iOS: <https://apps.apple.com/us/app/pristine-connect/id6474854328>

Android: <https://play.google.com/store/apps/details?id=com.pristine.pristineconnect>

LIC HRMS

HR management system supporting employee self-service workflows for LIC.
