PROFESSIONAL SUMMARY

Senior Flutter Developer with 5.9+ years of experience designing, building, and shipping production-grade cross-platform mobile applications across e-commerce, HR, identity, and enterprise domains. Proven expertise in Flutter and Dart architecture, state management (Provider, GetX, Bloc/Cubit, Riverpod), RESTful and Firebase-backed integrations, and end-to-end delivery from technical design through Play Store and App Store release. Published two open-source Dart packages on pub.dev and authored 20+ technical articles on Medium. Experienced in mentoring junior developers, owning features independently, and translating ambiguous business requirements into clean, maintainable, and testable code.

CORE COMPETENCIES

Flutter & Dart Development, Cross-Platform Mobile Architecture, Native Platform Channel Integration, State Management (Provider, GetX, Bloc/Cubit, Riverpod aware), Clean Architecture, Repository Pattern, Dependency Injection, RESTful API Integration, Firebase (Authentication, Firestore, Cloud Functions, FCM), Node.js/Express, MongoDB, WebSockets, Payment Gateway Integration (Razorpay, Stripe), Google Maps Integration, Localization (i18n), Push Notifications, Unit Testing, Widget Testing, Integration Testing, CI/CD Pipelines, Play Store & App Store Release Management, Performance Optimization, Custom Package Development, Agile Methodology, Team Leadership & Mentoring, Stakeholder Communication

TECHNICAL SKILLS

Languages & Frameworks: Dart, Flutter, JavaScript, Node.js

State Management: Provider, GetX, Bloc/Cubit, Riverpod

Architecture: Clean Architecture, Repository Pattern, Dependency Injection, Modular/Feature-First Structure

Backend & APIs: RESTful APIs, Firebase (Auth, Firestore, Cloud Functions, FCM), Node.js/Express, MongoDB

Testing & Quality: Unit Testing, Widget Testing, Integration Testing, bloc_test, Mocktail, Code Review

Performance & Tooling: Flutter DevTools Profiling, Rebuild Optimization, Lazy Loading & Pagination, App Size & Startup Optimization

Integrations: Google Maps, Localization (i18n), Local Storage, Push Notifications, Razorpay, Stripe

DevOps & Release: Git, CI/CD Pipelines, Play Store & App Store Release Management, Staged Rollouts

Platforms: iOS, Android, Web, Cross-Platform Development

Tools: Android Studio, VS Code, Xcode, Jira

AI Tools: GPT, Gemini, Claude, Agentic AI Workflows, Prompt Engineering

Dart Package (pub.dev): https://pub.dev/packages/watermark_image, https://pub.dev/packages/easy_dropdown

Spoken Languages: English, Hindi

PROFESSIONAL EXPERIENCE

Senior Software Engineer | Kellton Tech Solutions Limited | October 2023 – Present

- Own end-to-end Flutter feature delivery on client mobile applications, taking features from technical design through production release with minimal supervision.
- Architected a scalable, reusable app theming and color system with full light/dark mode support, replacing ad-hoc styling and giving the team a single consistent design language across every screen and module.
- Partner directly with backend engineers on Node.js/Express and MongoDB API design, including permission and role-based access control, to ensure the mobile app and backend contract stay in sync.
- Mentor junior Flutter developers through code review and pairing, raising code quality and performance standards across the team.

- Evaluate and integrate free-tier and production backend stacks (Render), reducing infrastructure cost while keeping deployments production-ready.

Flutter Developer | Cyfuture India Pvt. Ltd. | August 2022 – October 2023

- Built and maintained cross-platform Flutter applications, prioritizing responsive UI and smooth runtime performance across device sizes.
- Integrated RESTful APIs and third-party SDKs to ship key product features on schedule, working directly against client-defined timelines.
- Implemented state management solutions using Provider and GetX to streamline app architecture and cut boilerplate code.
- Took part in code reviews and structured testing cycles that kept release quality consistently high.

Software Developer – Flutter Developer | Virtual Employee Pvt. Ltd. | April 2021 – August 2022

- Built and shipped Flutter applications across multiple client projects, owning the full lifecycle from development through Play Store and App Store publishing.
- Worked directly with international clients to gather requirements and translate feedback into iterative feature updates.
- Implemented Firebase-based authentication, storage, and push notification workflows that became the standard integration pattern across client projects.

Mobile App Developer Trainee | Progmatic AI Pvt. Ltd. | February 2020 – September 2020

- Trained in Flutter and Dart fundamentals, contributing to early-stage mobile application development.

KEY PROJECTS

Roll Mobility — Accessibility navigation app helping wheelchair users, caregivers, and allies evaluate the accessibility of public spaces such as coffee shops, hotels, campuses, and event venues. [[Link](#)]

HMEL LEC — Land evaluation application capturing parameters including land dimensions, water availability, vegetation, and roadside infrastructure, with photo capture and GPS geo-tagging. [[Link](#)]

SharePa by Idemia — Step-by-step user guide application supporting product configuration workflows.

[[Android Link](#) | [iOS Link](#)]

Pristine Connect — Cross-platform healthcare collaboration app for surgeons, patients, and facility staff, streamlining clinical operations and improving patient outcomes. [[iOS Link](#)]

LIC HRMS — HR management system supporting employee self-service workflows for LIC. [[Link](#)]

Axon Fire — Flutter mobile game built independently end-to-end; resolved audio latency and frame-drop issues by integrating native Android SoundPool via platform channels. [[Link](#)]

mBox — A financial debit/credit tracker app. [[Link](#)]

EDUCATION

Master of Computer Applications (MCA)

Institute of Information Technology & Management, Janakpuri, New Delhi | August 2017 – June 2020
